

Hymenochaete cruenta

Blutroter Borstenscheibling

Fungi, Dikarya, Basidiomycota, Agaricomycotina, Agaricomycetes, Hymenochaetales, Hymenochaetaceae

Legitimate

(Pers.) Donk 1959

Aktueller Name gem. MycoDB: Hymenochaete cruenta (Pers.) Donk, Persoonia 1 (1): 51 (1959) [MB332302]

Basionym: Thelephora cruenta Pers., Synopsis methodica fungorum: 575 (1801) [MB226278]

Obligate Synonyme:

Thelephora mougeotii Fr., Elenchus Fungorum 1: 188 (1828) [MB230753]

Lomatina cruenta (Pers.) P. Karst., Finlands Basidsvampar (11): 156 (1899) [MB469804]

Cytidia cruenta (Pers.) Herter, Kryptogamen-Flora der Mark Brandenburg 6 (1): 83 (1910) [MB120271]

Corticium cruentum (Pers.) J. Schröt., Pilze Schl.: 423 (1888) [MB439769]

Taxonomische Synonyme:

Hymenochaete mougeotii (Fr.) Masee, Botanical Journal of the Linnean Society 27: 111 (1890) [MB218666]

Corticium nesporii Velen. (1922) [MB473214]

Hymenochaete sphaeriaecola Lloyd, Mycological Writings 7 (74): 1338 (1925) [MB278538]

Merulius mougeotii (Fr.) Pat., Revue Mycologique Toulouse 12: 133 (1890) [MB469898]

Stereum mougeotii (Fr.) Quél., Flore mycologique de la France et des pays limitrophes: 16 (1888) [MB440470]

Corticium mougeotii (Fr.) Fr., Epicrisis Systematis Mycologici: 558 (1838) [MB236714]

Corticium nesporii Velen., Ceske Houby 4-5: 757 (1922) [MB534645]

Hymenochaete mougeotii (Fr.) Cooke: 147 (1880) [MB586396]

botanisch / ökologisch

Standort

Auf Abies alba, Weisstanne

Gattung/en:

Hymenochaete
