

## Leratiomyces squamosus

## Schuppiger Träuschling

Fungi, Dikarya, Basidiomycota, Agaricomycotina, Agaricomycetes, Agaricomycetidae, Agaricales, Strophariaceae

Legitimate (Pers.) Bridge & Spooner 2008

Aktueller Name gem. MycoDB: *Leratiomyces squamosus* (Pers.) Bridge & Spooner, Mycotaxon 103: 117 (2008) [MB511256]

Basionym: *Agaricus squamosus* Pers., Synopsis methodica fungorum: 409 (1801) [MB249605]

Obligate Synonyme:

*Stropharia squamosa* (Pers.) Quéél., Mémoires de la Société d'Émulation de Montbéliard 5: 348 (1873) [MB249948]

*Psilocybe squamosa* (Pers.) P.D. Orton, Notes from the Royal Botanical Garden Edinburgh 29 (1): 80 (1969) [MB337866]

*Rhabdospora pleosporoides* var. *rubescens* (P. Karst.) Sacc., Sylloge Fungorum 3: 589 (1884) [MB137401]

*Hypholoma squamosum* (Pers.) Urbonas, Liet. TSR Mokslu Akad. Darb.: 12 (1975) [MB283489]

*Geophila squamosa* (Pers.) Quéél., Enchiridion Fungorum in Europa media et praesertim in Gallia Vigentium: 111 (1886) [MB493712]

*Fungus squamosus* (Pers.) Kuntze: 480 (1898) [MB526472]

*Naematoloma squamosum* (Pers.) Singer, Sydowia 2 (1-6): 36 (1948) [MB521780]

*Psalliota squamosa* (Pers.) P. Kumm., Der Führer in die Pilzkunde: 73 (1871) [MB507970]

*Stropholoma squamosum* (Pers.) Balletto, Micologia Italiana 18 (1): 36 (1989) [MB534426]

*Hypholoma squamosum* (Pers.) Urbonas: 128 (1999) [MB539572]

*Hypholoma squamosa* (Pers.) Urbonas (1999) [MB474479]

*Stropholoma squamosum* (Pers.) Ryman: 913 (2008) [MB546716]

Taxonomische Synonyme:

*Stropholoma squamosa* (Pers.) Balletto (1989) [MB136395]

*Agaricus distans* Pers., Neues Magazin für die Botanik 1: 103 (1794) [MB230082]

*Stropharia distans* (Pers.) Morgan, Journal of Mycology 14 (2): 75 (1908) [MB232567]

*Agaricus squamosus* var. *distans* (Pers.) Pers., Synopsis methodica fungorum: 409 (1801) [MB498045]

*Nematoloma squamosum* (Pers.) Singer (1948) [MB288712]

*Stropholoma squamosus* (Pers.) Balletto (1989) [MB283426]

*Agaricus squamosum* Pers. (1801) [MB372259]

makroskopisch

**Hutmerkmale**

Schleimig, mit Schuppen

**Stielmerkmale**

Faserigschuppig mit Ring

Varia

**Bestimmt als**

*Stropharia squamosus*

**Gattung/en:**

Leratiomyces
