

Marasmius cohaerens

Hornstieliger Schwindling

Fungi, Dikarya, Basidiomycota, Agaricomycotina, Agaricomycetes, Agaricomycetidae, Agaricales, Marasmiaceae

Legitimate (Pers.) Cooke & Quél. 1878

Aktueller Name gem. MycoDB: Marasmius cohaerens (Pers.) Cooke & Quél., Clavis synoptica Hymenomycetum Europaeorum: 153 (1878) [MB118871]

Basionym: Agaricus cohaerens Pers., Synopsis methodica fungorum: 306 (1801) [MB455716]

Obligates Synonym: Mycena cohaerens (Pers.) P. Kumm., Der Führer in die Pilzkunde: 111 (1871) [MB176140]

Taxonomische Synonyme:

Marasmius setulosus Murrill, Bulletin of the Torrey Botanical Club 67: 150 (1940) [MB287958]

Agaricus ceratopus Pers., Mycologia Europaea 3: 131 (1828) [MB149573]

Marasmius ceratopus (Pers.) Quél., Flore mycologique de la France et des pays limitrophes: 319 (1888) [MB438649]

Agaricus rigidus Lasch, Linnaea 4: 531 (1829) [MB244204]

Marasmius cohaerens: glatter Stiel

Marasmius torquescens: haarig-flaumiger Stiel (Lupe)

makroskopisch

Stielmerkmale

Sehr harte, glatter an Horn erinnernder Stiel

mikroskopisch

Hutdeckschicht

Mit bürstigen Zellen

Gattung/en:

Marasmius <https://www.mycopedia.ch/pilze/1056.htm>
