

Melanoleuca substrictipes

Weisser Alpen-Weichritterling

Fungi, Dikarya, Basidiomycota, Agaricomycotina, Agaricomycetes, Agaricomycetidae, Agaricales, Tricholomataceae

Legitimate

Kühner 1978

Aktueller Name gem. MycoDB: *Melanoleuca strictipes* (P. Karst.) Jul. Schäff., *Agaricalium Europaeorum clavis dichotomica*: 157 (1951) [MB300347]

Basionym: *Tricholoma strictipes* P. Karst., *Meddelanden af Societas pro Fauna et Flora Fennica* 6: 7 (1881) [MB183596]

Taxonomische Synonyme:

Melanoleuca parisianorum R. Haller Aar. ex Bon, *Documents Mycologiques* 18 (70-71): 30 (1987) [MB132824]

Melanoleuca parisianorum f. *parisianorum* (?) [MB417871]

Melanoleuca parisianorum f. *clitocyboides* Bon, *Documents Mycologiques* 18 (70-71): 30 (1987) [MB117861]

Melanoleuca substrictipes Kühner, *Bulletin Mensuel de la Société Linnéenne de Lyon* 47 (1): 52 (1978) [MB317474]

Agaricus subalpinus Britzelm. (1893) [MB486973]

Tricholoma subalpinum (Britzelm.) Sacc., *Sylloge Fungorum* 11: 12 (1895) [MB192182]

Melanoleuca subalpina (Britzelm.) Bresinsky & Stangl, *Beihefte zur Zeitschrift für Pilzkunde* 1: 46 (1976) [MB317472]

Tricholoma cnista subsp. *evenosum* Sacc., *Sylloge Fungorum* 5: 132 (1887) [MB173006]

Tricholoma evenosum (Sacc.) Rea, *Transactions of the British Mycological Society* 17 (1-2): 40 (1932) [MB252063]

Melanoleuca evenosa (Sacc.) Konrad, *Flore d Algerie, Cryptogamie*: 272 (1927) [MB456918]

Tricholoma cnista subsp. *evenosum* Sacc. (1887) [MB462663]

Melanoleuca substrictipes var. *sarcophylla* Kühner, *Bulletin Mensuel de la Société Linnéenne de Lyon* 47 (1): 52 (1978) [MB580467]

Melanoleuca substrictipes var. *sarcophyllum* Kühner (1978) [MB348450]

Melanoleuca excissa f. *sarcophylla* (Kühner) Fontenla, Para & Vizzini, *Mycotaxon* 118: 374 (2011) [MB563142]

mikroskopisch

Sporenmerkmale

Feinwarzig punktiert

Cheilozystiden

Apikal inkrustiert

chemisch

Melzers-Reagenz

Sporen stark amyloid

Gattung/en:

Melanoleuca
