

Schizothecium aloides

Fungi, Dikarya, Ascomycota, Pezizomycotina, Sordariomycetes, Sordariomycetidae, Sordariales, Schizotheciaceae

Legitimate (Fuckel) N. Lundq. 1972

Aktueller Name gem. MycoDB: Schizothecium aloides (Fuckel) N. Lundq., Symbolae Botanicae Upsalienses 20 (1): 253 (1972) [MB323130]

Basionym: Sordaria aloides Fuckel, Fungi Rhenani Exsiccati. Supplementi Fasc. 11: no. 2549 (1873) [MB463503]

Obligate Synonyme:

Podospora aloides (Fuckel) Mirza & Cain, Canadian Journal of Botany 47 (12): 2004 (1970) [MB320814]

Sordaria curvula var. aloides (Fuckel) G. Winter, Abh. naturforsch. Ges. Halle: 38 (1873) [MB138882]

Sphaeria curvula var. aloides (Fuckel) Cooke (1883) [MB465718]

Neoschizothecium aloides (Fuckel) S.K. Huang & K.D. Hyde, Fungal Diversity 111: 539 (2021) [MB558331]

Taxonomische Synonyme:

Sordaria coronifera Grove, Journal of Botany, British and Foreign 54: 185 (1916) [MB148073]

Podospora coronifera (Grove) Cain, Canadian Journal of Botany 40 (3): 459 (1962) [MB337393]

Pleurage curvula var. coronifera (Grove) C. Moreau, Encyclopédie Mycologique 25: 235 (1954) [MB347430]

makroskopisch

Fruchtkörper / Habitus / Wachstumsform

Hals mit dichten Büscheln zusammengeklebter, langer Haare umgeben.

Bemerkungen / Hinweise / Abstract

Swollen agglutinated hairs usually up to 350 µm long, concentrated at the neck base. Spore head 31.5-38 × 15.5-17 µm (31-40 × 15-23, MIRZA & CAIN, 1969; 32-37 × 18-20, LUNDQVIST, 1972; 31-37 × 16-20, BELL & MAHONEY, 1995). Pedicel 12-17 × 2-4 µm. Upper cauda 30-50 µm long, longitudinally veined, with some transverse constrictions; lower cauda narrower and somewhat shorter, solid. Sometimes other two short, lateral caudae arising from the base of the pedicel. Particularly on cattle dung.
