

Seimatosporium massarina

Fungi, Dikarya, Ascomycota, Pezizomycotina, Sordariomycetes, Xylariomycetidae, Amphisphaeriales, Discosiaceae, Discostroma

Legitimate (Sacc.) Jaklitsch & Voglmayr 2016
Voglmayr

Aktueller Name gem. MycoDB: Seimatosporium massarina (Sacc.) Jaklitsch & Voglmayr, IMA Fungus 7 (1): 133 (2016) [MB817259]

Basionym: Metasphaeria massarina Sacc., Miscellanea mycologica: 22 (1884) [MB247835]

Obligate Synonyme:

Clethrimum massarinum (Sacc.) Berl. (1895) [MB445543]

Discostroma massarina (Sacc.) Arx, The genera of fungi sporulating in pure culture: 131 (1974) [MB283440]

Clethrimum massarina (Sacc.) Berl., Icones fungorum 2 (4/1): 110 (1897) [MB624038]

Taxonomische Synonyme: Clathridium massarinum (Sacc.) Berl. (1895) [MB527615]

makroskopisch

Substrat

Ribes

Sporenfarbe / Sporenpulver (Abwurf)

Hyalin

mikroskopisch

Sporenform

Mauerförmig, 4fach septiert

chemisch

Barals

IKI +

Varia

Bestimmt nach

Handbook of Ascomycota Vol Ia und Vol Ib - Wergen, Björn - Funghiparadise Production

Gattung/en:

Seimatosporium
